

#DynaMob 2.0 Roads

The Partners identified two #DynaMob 2.0 Roads devoted to sustainable mobility within the territorial boundaries of each municipality. #DynaMob 2.0 Roads were selected through research on the reference territory and an analysis on the mobility and urban plans of the involved municipalities.

The Municipality of Copertino

The Municipality of Copertino identified two itineraries to be devoted to sustainable mobility:

- ARCO IONICO WINE ROUTE
- CICLOVIA DEI TRE MARI

In order to better contextualise such routes within Copertino's territory and landmarks, the Municipality elaborated a type of direction signs that, in compliance with the Italian road rules, will mark the routes and will make clear reference to some specific landmarks.

The Municipality of Campobasso

Even the Municipality of Campobasso managed to identify the itineraries devoted to sustainable mobility and that are marked by specific direction signs.

The itinerary has a length of about 5.2km and it connects Piazza Falcone and Borsellino to Bosco Faiete.
